

Frontend Developer

CAREER SUMMARY:

I am an experienced and dedicated frontend developer with a passion for creating exceptional user experiences through intuitive and visually appealing web interfaces. With a solid background in front-end frameworks/libraries, I have successfully designed and developed responsive and interactive web applications. Throughout my career, I have demonstrated expertise in translating design concepts into functional UI components, collaborating closely with UX designers and back-end engineers to ensure seamless integration.

In addition to my technical skills, I am an excellent problem solver with a strong attention to detail. I have a track record of identifying and resolving front-end issues, optimizing code for performance, and continuously improving the user interface.

As a collaborative team player, I thrive in cross-functional environments and have effectively communicated and coordinated with designers, product managers, and other stakeholders to deliver high-quality projects within deadlines.

■ PROFILE SYNOPSIS

Over 3+ years of experience in:

ReactJs & Redux ✦ Material UI ✦ React Semantic UI ✦ React Native Paper ✦ Ant Design ✦ Typescript ✦ JavaScript ✦ Nodejs ✦ HTML-5 ✦ SCSS ✦ CSS-3 ✦ LESS ✦ Bootstrap-3 ✦ Code Igniter ✦ Core PHP ✦ MySQL ✦ MySQLi

Functional Skills:

- 3+ years of professional experience in design, development and implementation of Web based applications
- Experience with integrated development environment (Rapid PHP, and visual studio).
- Expertise in design and development of various web and enterprise applications using JavaScript, Web Services.
- Design application as per spec designed by UX developer.
- Good programming, bug fixing, problem solving and trouble shooting skills.
- Comfortable working in research, design and development.
- Hard working and complete commitments on time.
- High degree of professional and emotional maturity with analytical, problem solving & interpersonal skills
- Strong work ethics & integrity across my personal and professional lifespan.
- Self-motivated professional and result oriented with excellent track record in both individual and team environments.

Key Responsibilities:

- Worked in In-House Software Team as Frontend developer (Dental Chart).
- Coordinate with other team leads, such as backend developers and testers, to ensure seamless integration of UI components with the overall application.
- Optimize the performance of the user interface to ensure fast and responsive applications.
- Address and resolve issues related to page load times, rendering, and overall user experience
- Creating reusable component, which can be utilize by other team member.
- Worked on complete Agile/Scrum Methodology with daily standup meetings to update the working status regarding progress of the project.
- Creating Cross-browser compatible and standards-compliant CSS-based applications.
- Implemented cross platform integration with PHP

1. Project: **Dental Chart**

Summary: A dental chart application uses React for the frontend and PHP for the backend. Doctors can select a tooth, add a specific service to it, and save the tooth number and service ID to the patient's record in a MySQL database.

- **Project Type:** Dental Software (Web application)
- **Technologies:** ReactJs, Redux, HTML-5, MUI, PHP, MYSQL Server 2019.

2. Project: [Al Rabeeh Hospital Official Website \(Manama, Bahrain\)](#) ↗

Summary: Responsive website developed using Wordpress

- Responsive Web Design (RWD) UI, Rich Restful Service Applications, and HTML Wireframes using HTML5 Grid Structures/Layouts, CSS3 Media Queries
- Implemented Responsive Web Design Techniques into (media queries) CSS for mobile and tablet form factors

• **Technologies:** CSS, HTML-5, JAVASCRIPT, PHP, WORDPRESS, MYSQL Server 2019.

3. Project: [Al Rabeeh Dental Official Website \(Budaiya, Bahrain\)](#) ↗

Summary: Responsive website developed using Wordpress

- Responsive Web Design (RWD) UI, Rich Restful Service Applications, and HTML Wireframes using HTML5 Grid Structures/Layouts, CSS3 Media Queries
- Implemented Responsive Web Design Techniques into (media queries) CSS for mobile and tablet form factors

• **Technologies:** CSS, HTML-5, JAVASCRIPT, PHP, WORDPRESS, MYSQL Server 2019.

Key Responsibilities:

- Worked on complete Agile/Scrum Methodology with daily standup meetings to update the working status regarding progress of the project.
- Designed dynamic client-side JSX codes to build mobile application, stacks navigation
- Developed User Login Validation by using React Native Custom forms and Validation
- Replicated, documented and prototyped entire mobile UI interaction theme into Android and IOS Platform.
- Developed the Ui based on specs provided by UI/UX designer (Figma).
- Worked on JavaScript frameworks (React Native) to augment mobile based applications with functional component capability.
- Strong communication, analytical and interpersonal skills working within cross-functional teams.
- Developed and maintained Frontend mobile applications for iOS and Android using React Native
- Integrated APIs with Axios and managed global state with Redux Toolkit
- Implemented live location features and handled MCQ tracking with asynchronous storage
- Performed Manual/Unit testing of Web & Mobile applications and troubleshoot issues.

1. Project: [The Partimers ↗](#).

Summary: The Partimer is a dedicated platform for part-time jobs and simplified application processes in the UK, providing an end-to-end solution for part-time recruitment. It offers flexibility with recorded interview sessions that can be reviewed at the user's convenience. The platform uses Redux and Async Storage, employs Axios for API integration, and manages multiple user accounts, including employers and employees, on both iOS and Android platforms.

- **Project Type:** (Mobile application)
- **Technologies:** React Native, React-Native Paper, Node js, Express js, Mongo DB.

2. Project: [My PhoneBook ↗](#).

Summary: The app, based on the 'Vocal for Local' concept, provides users with details of services and utilities available nearby. It offers local service providers, small businesses, and vendors a platform to reach potential customers. Key features include:

- **State Management:** Utilizes Redux and Async Storage.
- **API Integration:** Uses Axios for API integration.
- **Performance Optimization:** Employs memoization techniques.
- **Geo-Location:** Fetches the user's current location to display relevant services.
- **Project Type :** (Mobile application)
- **Technologies:** React Native, React-Native Paper, Node js, Express js, Mongo DB, Redux.

Description: I have worked on an eCommerce site and mobile application built around the concept of 'Vocal for Local.' The app allows users to buy clothes or goods that can be delivered within 40 minutes. My role was to handle the entire process of adding products, managing their availability by making them active or inactive, and designing product photos for the eCommerce website. Essentially, I worked as an administrator.

Role : Web Developer and Designer

Key Responsibilities:

- Worked as Ui developer on web based applications.
- Maintaining and managing the application with its day-to-day activities.
- Define the architecture of new application.
- Responsible to understand requirement and work on it.
- Created Sample design based on their requirements.
- Moving the application from Development to production system.
- Design the databases for suitable technologies based on application requirements.
- Built websites and web applications from scratch, including layout design, user interface, and functionality.
- Utilized HTML, CSS, JavaScript, and Bootstrap for the frontend, and PHP and CodeIgniter for the backend
- Developed website using Wordpress.
- Tracked and reported problems with site designs, providing remedial suggestions for resolution.

1. Project: [Attar Steels Structures ↗](#)

- **Project Type** : Web Application
- **Duration** : 1 month
- **Technologies**: HTML-5, CSS3, JavaScript, PHP, Wordpress.

2. Project: [Siddhi Vinayak Transformer Industries](#)

- **Project Type** : Web Application
- **Duration** : 1 month
- **Technologies**: HTML-5, CSS-3, JavaScript, JQuery, Wordpress, Bootstrap-3, AJAX.

3. Project: [SkyCam ↗](#)

- **Project Type** : Web application
- **Duration** : 1 month
- **Technologies**: HTML-5, CSS-3, JavaScript, Bootstrap-3, AJAX, Wordpress, PHP.

4. Project: [PTPCNC Toolings ↗](#)

- **Project Type** : Web application
- **Duration** : 1 months
- **Technologies**: HTML-5, CSS-3, JavaScript, Bootstrap-3, AJAX, Wordpress, PHP.

Internship ▶ Phenom Sys n Services.

Mar 2017 – July 2017

Role : Intern

Key Responsibilities:

- Working as Ui Designer.
- Handle Responsiveness of Website with media queries.
- Made documentation on product like user manual.

■ EDUCATION & CREDENTIALS2013 **BCA** Bharatesh College of Computer Application – BCA, Belgaum Karnataka (Rani channamma University).**■ PROFILE****Portfolio** : <https://hsportfolio-six.vercel.app/>**Github** : <https://github.com/Harispatel>**LinkenIn** : [LinkedIn | Haris Patel](#)
